Stephanian Kamalesh Sharma on Commonwealth Day 14/15.03.2016

As 53 countries, including India today celebrated the Commonwealth Day, Queen Elizabeth has underlined that being "inclusive" and accepting "diversity" will go far deeper than acknowledging "differences at face value and being tolerant.

In his Commonwealth Day message, Commonwealth Secretary General **Kamalesh Sharma**, said: "Globalisation, the digital revolution and interdependence make us both a rapidly compacting but also colliding world.

"The strengths of the Commonwealth were never needed more to assert fairness in global outcomes and trust in the richness of our human identities," he said.

The Commonwealth represents 2.3 billion people, of which 60 per cent are under 30.
